

POP TECHNICAL DEVICE

## BREATHE BETTER WHILE PROTECTING YOURSELF

---

**Compatible with all types of mask**

---

- Purifies the air you breathe
- Releases a powerful balsamic action
- Makes wearing a mask pleasant

POP® can be applied inside any type of mask that protects you from viruses and bacteria. The product offers excellent purification of the breathed air, thanks to the extraordinary balsamic effect of the 100% natural extracts contained in it, making wearing a mask, even for long periods, more pleasant. POP® fulfils a mission: to play a social role by helping as many people as possible to wear the mask correctly, thus protecting themselves and others. POP® achieves this ambitious goal with its innovation and the naturalness of its sophisticated aromatic architecture.

## INDICATIONS FOR USE

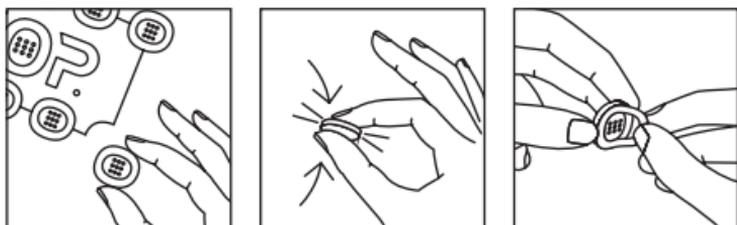

POP® is ideal for everyone who experiences discomfort when wearing a mask, whether for a few minutes or all day long. Impure air, a feeling of constriction and the recirculation of bad breath can all be overcome with POP®.

## HOW IT WORKS

The calibrated balsamic and natural mixture that makes up the POP® formula penetrates the controlled permeability biocompatible membrane, which ensures the agreeable gradual and lasting diffusion of the product.

## MODE OF USE

POP® can be applied inside any type of mask. Remove the blister from the protective wrapper and break off a POP®. Hold the POP® between thumb and index finger, press firmly to break the microsphere, releasing the volatile substances. Remove the protective film from the adhesive disc.

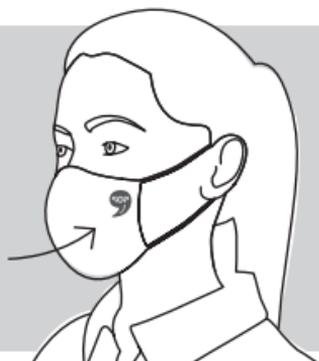

Apply the POP® inside the mask, in the space between nose and mouth. Put the mask on and breathe normally. After opening the pack for the first time, put the blister, information leaflet and stickers in the provided POPBAG.

Once activated, POP® works for a whole day. Replace it at the end of the day.

To communicate your conscious choice, apply the sticker on the outside of the mask!

## WARNINGS

- EXTERNAL USE.
- DO NOT INGEST.
- Do not use in case of known individual hypersensitivity to the product and its components.
- Feeling a slight tingling by the nasal and oral mucosa when using the product is to be considered as a normal manifestation of the natural activity of the device.
